PREFACE.

THE revision and enlargement of Professor W. W. Goodwin's *Greek Grammar*, republished last year, has made necessary a new edition of my First Lessons in Greek. I have taken this opportunity to submit the book to a rigorous revision. As the result of this, though the original plan of the Lessons remains unaltered, there has been not a little change in its details.

I was aware, when this book was first published in 1876, that its plan necessarily made it more difficult than books of its kind ordinarily are. I waited, therefore, with interest to see whether these difficulties, which I had thought it better for the pupil to meet at once in his first year's study and not to defer to an evil day, had been presented so gradually as to make it possible for the Lessons to be used widely in our public schools. That fact was soon established, and I think I may now say that the peculiar features of the book have met with general and hearty approval. Important among these are the introduction of the verb from the first and the subsequent development of its inflexion alternately with that of the other parts of speech, the introduction from the beginning of exercises consisting of complete sentences for practice in translation, and the development of the verb at first by moods and not by tenses.

I am glad to know that this last feature has recommended itself to teachers, and that it is now agreed that the point of view of the Grammar, which necessarily states the facts of the language scientifically, looking first to the forms of words and not to their use, is not the one to take in giving the pupil his first insight into the language considered as a means for the expression of thought. An illustration of the truth of this may be drawn from the subjunctive and optative. As was urged in the first edition, the uses of these moods in Greek, though delicate, are nevertheless clearly defined. When the beginner first learns their forms, he should at once have the more common of these uses explained to him. The proposition is the element of language, and from this individual words and forms derive their whole relational significance. But in fact, when the subjunctive and optative are not studied singly but are presented tense by tense along with the other moods, frequently a blind and often incorrect translation of the one by *may*, etc., and of the other by *might*, etc., is allowed, as if they were independent in their use like the indicative, a translation in which the pupil has no adequate feeling of their force. It may be easier to learn the mere forms of the verb by tenses than by moods, a single tense stem being presented at a time, but in the case of a pure verb the changes of stem in the different tenses resulting from augment and tense sign can hardly be called a matter of great difficulty.

In this book, therefore, *λύω*, as the representative of pure verbs, has first been presented by moods. Its development, however, is very gradual, running through sixteen lessons. It has, moreover, been carefully borne in mind in these lessons that *λύω* is the type, and any

peculiar euphonic changes in the forms of the pure and mute verbs that have been introduced have been explained as they have occurred, generally in the foot-notes. It is at Lesson XXXV. that a systematic development of the verb by tense stems begins, though the subject of tense stems in pure and mute verbs is presented in part in Lesson XX. This part of the book has been enlarged by five lessons, and it is hoped that the verb, that one great difficulty which he who would learn Greek may not avoid, is now so fully and yet so gradually presented as to make the mastery of its forms if not easy, at least possible without discouragement.

The exercises in immediate connection with the lessons have been taken mainly from the first four books of Xenophon's *Anabasis*. They are designed from the first as a drill not only on forms but also in syntax, the simpler principles of which are early introduced and illustrated. They consist entirely of complete sentences, each of which illustrates some principle of the lesson in which it occurs. These sentences have been transferred with as little change as possible from the original. It is obvious that it will be a great advantage to those who subsequently read the *Anabasis* to have previously studied in this careful way so great a part of it. Forms, however, cannot be learned, especially by English-speaking boys, whose own language is almost destitute of inflexions, without constant and recurring practice. To supply materials for this practice there have been added to the lessons, at the end of the book, twenty-five additional exercises on forms to be taken by way of review, as the lessons proceed. In these no attempt has been made to illustrate syntax systematically, and the sentences (for

phrases have not been admitted even here) have been made as brief as possible, though each introduces one or two, often many, illustrations of the forms under consideration. These additional exercises are drawn from various sources, but mainly from excellent books for beginners by Böckel, by Schenkl, and by Kühner.

In introducing the syntax, all idioms peculiar to Greek have been carefully explained on their first occurrence, and this explanation has often been subsequently again referred to in the notes; but idioms identical with the English, as e. g. the infinitive not in indirect discourse, have been freely employed from the first. The first year's knowledge of Latin also has been assumed in introducing constructions. The last twenty lessons are intended to give a drill on the general principles of syntax, and only the largest print of the sections in the grammar cited at the head of the lessons is to be learned. If under any particular construction there is a special fact of unusual difficulty or importance, attention is called to it in the notes. It is recommended that these lessons be taken at the rate of one or two a week in connection with the author whom the class shall have taken up on finishing Lesson LX. It should be added that the English parts of the exercises of these twenty lessons are not designed as a systematic course in Greek Composition. To meet this want, an American edition of Mr. Arthur Sidgwick's *First Greek Writer* is about to be published, and so the promise of four years ago at length fulfilled.

The vocabularies, both special and general, have been made with care and from the point of view of the derivation and composition of words, on the study of which too great stress can scarcely be laid. Lessons LIX. and

LX. should be introduced early in parts, and the student taught the habit of analyzing the words in his exercises to get at their meaning. In the Greek-English vocabularies, English words that are cognate with the preceding Greek words have been printed in small capitals, borrowed words in black letter. The former show the influence of the phonetic principle, familiarly known as *Grimm's Law*. According to this law, π and ϕ will generally appear in English respectively as *f* and *b*; κ , γ , and χ , as *h*, *k* or *c*, and *g*; and τ , δ , and θ , as *th*, *t*, and *d*, though there are many exceptions. A borrowed word, on the other hand, is one transferred directly without consonantal change from Greek into English. This connection between the Greek and English words has not been traced out exhaustively. What is given is intended to be suggestive, and leaves much that may be done by the teacher.

The special vocabularies should be well committed to memory. The words in these are taken from sentences in the exercises of the lesson in which they occur, and no word is repeated. In these vocabularies, in the course of the book, the student learns over four hundred Xenophonic words in common use. The parts of the verbs have been given, without abbreviation of the forms, from Veitch. Late forms have been excluded, but forms on the other hand occurring exclusively in Homer have been given when necessary to complete the parts of a verb. When Veitch does not catalogue the verb, only the present and future are given in the general vocabulary, unless the verb has occurred also in one of the special vocabularies. In the general Greek-English vocabulary, further, the prepositions are now fully treated, the simple stems of the

verbs and the class to which the verb belongs are given, the cases accompanying the verbs stated where necessary, and the natural quantities marked. This last feature is new to this book and unusual in books of this grade. But the conviction has been growing upon me, that we ought, from the very beginning, to mark by our pronunciation the difference between $\check{\alpha}$, $\check{\iota}$, and $\check{\upsilon}$, and $\bar{\alpha}$, $\bar{\iota}$, and $\bar{\upsilon}$, just as we do between ϵ and η , and o and ω . The pupil's higher work in later years will be made easier if attention is paid to natural quantities from the start. In the English-Greek vocabulary there is no systematic treatment of synonyms, which have been given only so far as necessary to guide the pupil in his choice of words. It is scarcely necessary to add that this vocabulary is special, and not designed for use with any other English sentences than those occurring in this book.

The use of blackboards, extensive enough for the entire class, is strongly recommended. The Greek of the English exercises might the first day be put on the board, and the second day recited orally. By this use of the blackboard, classes are soon initiated into the mysteries of accentuation. The teacher should also, with the material here given, make other short sentences to be translated, both Greek and English. This additional drill should be mainly oral, and conducted rapidly. We should train not only the eye, but also the ear of our pupils.

As to the order of the words in translating the English sentences into Greek, the pupil should be warned against the wrong placing of post-positive and adjective words and phrases, and further against following the English arrangement slavishly. As a general guide he should know that in Greek the subject followed by its modifiers

stands first, the verb preceded by its modifiers last, though often, as in English, the verb precedes its modifiers either wholly or in part; but there are many exceptions, and too much attention should not be paid to the matter of the order of the words at first. These English sentences are for the most part translations, and for the satisfaction of teachers who may care to know the original order and choice of the words, the original sentences have been published in pamphlet form, and may be had on application to the publishers.

As is known, Professor Hadley's *Greek Grammar* is now undergoing revision. When the new edition appears, a companion pamphlet of parallel references will be prepared for the accommodation of those who, using this grammar, would like to use also the materials collected in the Lessons. These will not be numerically arranged in columns, but given in sets under the head of each lesson, repeating the references made to Goodwin's *Grammar*, a method of references, it is believed, as complete and satisfactory as could be desired.

It cannot be expected that the book as it stands, without omission or division of the lessons, will meet the wants of all schools. To make the shortening of the lessons, when necessary, easier, the exercises up to the syntax have been divided into four sections, the second and fourth of which need not be taken. The additional exercises on forms also may either be omitted or drawn from on occasion. In general, however, the book had best be taken entire, in the manner prescribed, at such rate of progress as is possible in each particular case. It is believed that ordinarily, excluding the twenty lessons on syntax, it can be completed and the class set to read-

ing an author in two terms of three months each. There will be much difference of opinion, also, as to how much introductory matter should be learned before the class proceeds to the subject of inflexion, and on this account this part of the book has not been divided into lessons. The directions at the beginning of each lesson have been made as definite as possible. But it will be well for the teacher to go over each lesson with his class before they undertake it, telling them definitely what to learn and forestalling its greater difficulties.

The pleasure remains to me of expressing my grateful thanks to the many friends who have assisted me not only in the preparation of the original edition of this book but also in its revision. Neither undertaking was in itself enlivening; but the help and encouragement I have had have done much to lighten what otherwise might have proved a tedious task. The care necessary to free a book of this sort of errors is infinite; and I have no doubt that though I have spared no time or pains with it mistakes remain. These can easily be corrected in the plates, and I shall be under obligations to any one who will point them out.

FIRST LESSONS IN GREEK.

INTRODUCTORY.¹

THE portions of the Grammar designated by the following numerals are to be well learnt before taking up Lesson I.² The parts which are here included of § 15, § 16, and § 17 are given that teachers who think it advisable may give their pupils at the outset a *comprehensive* view of the Euphony of Consonants, the principles of which, however, will be cited singly in the Lessons as they are needed. But these may be omitted, if thought best, until Lesson XVI. is reached. Before any attempt to learn the following paragraphs, the teacher should go over them carefully with the class, pointing out in each case how the examples illustrate the principle.

GRAMMAR³: § 1, with N. 1, together with the system of pronunciation given on page xi; § 2, with N.; § 3, with N.; § 4, 1 (with N. 1) and 2; § 5, 1 and 2; § 6, with 1 and 2, and N.; § 7, with N.; § 15, 1 and 2; § 16, with 1 (and N. 2), 2, 3, 4, 5, and 6; § 17, 1, 2, and 3; § 18, 1 and 2; § 19, 1, 2, and 3; § 20, with 1, 2, and 3; § 21, 1, 2, and 3; § 22, 1 and 2; § 23, 1; § 31.

After learning § 1, with the system of pronunciation, give the name and English equivalent of each letter in the following Exercise. After § 2 and § 3 point out the vowels and diphthongs and give their sounds. After § 5 classify the consonants, and after § 6 classify them a second time, *minutely*.

After the remainder of the references to the Grammar, point out and name the breathings and accents, and name the words according to their accentuation (§ 21, 2), and then pronounce the Exercise entire. (The hyphens show the division of the words into syllables according to § 18, N.)

NOTES.

¹ The number of Lessons into which this introductory matter shall be divided is left to the judgment of the teacher.

² Let the teacher at the outset go over the "Introduction" (pages 1-3 of the Grammar) with the class, using maps.

³ Those portions of the Grammar that are to be committed to memory are designated here and in the following Lessons by paragraph and subdivision. Occasionally, however, more specific directions are given.

NOTES.

¹ With the passive of many of the verbs that take the infinitive in indirect discourse (Lesson XXXI.) we either find the infinitive itself with its subject accusative as subject of the principal verb (the normal construction), or, as here, the subject accusative of the infinitive becomes the subject nominative of the principal verb. In this example, to illustrate, we might have also λέγεται Ἀπόλλωνα νικῆσαι, *it is said that Apollo defeated*, where the noun is the subject of the infinitive and the infinitive is the subject of λέγεται, representing the possible active construction, λέγουσιν Ἀπόλλωνα νικῆσαι, etc. λέγω, however, in the active voice rarely takes the infinitive in indirect discourse, § 260, 2, n. 1.

² οἱ also would be correct, § 144, 2.

³ § 142, 4, n. 3.

⁴ On the derivation of this word, see further the general vocabulary.

⁴ Conjugate in the same manner the second perfect and pluperfect active of *πράσσω* and *φαίνω* through all the moods. Take each tense of *λείπω* and *φαίνω* which you have conjugated, and analyze it, pointing out the *present stem*, the *simple stem*, *augment*, *tense stem*, *connecting vowels*, and *personal endings*.

⁵ The class of some of these verbs remains to be more fully considered hereafter: *γίγνομαι*, *πάσχω*, and *πίπτω* belong to § 108, VIII.: *λείπω* and *φεύγω* to § 108, II.

⁶ The present stem is a syncopated and reduplicated form of the simple stem, § 109, 7, *b* and *c*, and the future and perfect middle add *ε* to the simple stem, § 109, 8.

⁷ Mute stems which assume *ν* on *αν* in the present have their proper form only in the second aorist; except in the present and second aorist they either lengthen the short vowel (like verbs of the second class, § 108, II.) or add *ε* (§ 109, 8).

⁸ *πάσχω* for *παθ-σκω*, § 16, 2; *πείσομαι* for *πενθ-σομαι*, § 16, 6, N. 1.

⁹ See § 109, 7, *b* and *c*; *πесουμαι* for *пет-σομαι*, § 110, II. 2, N. 2. *ἐ-πεσ-ον* is for *ἐ-πετ-ον*, which is in fact the form of the second aorist in Doric Greek.

¹⁰ The perfect is an exception to the principle stated in note 7.

¹¹ For *φευξομαι*, a Doric future, see § 110, II. 2, N. 2.

¹² § 159, N. 2.

¹³ § 283, 9.

¹⁴ *To have fallen.* *δοκέω* in the sense *to seem* takes the infinitive in indirect discourse, usually in the personal construction. See note 1, Lesson XXXIX.

¹⁹ Use the second aorist.

²² Use *γίγνομαι*.

²⁴ *παρά.*

²⁶ That is, *as follows.* Use an adverb.

²⁷ *εἰς.*

² The numeral in parenthesis designates the class to which the verb belongs. When no such numeral occurs, the verb (except irregular verbs in **μι**) belongs to class I.

³ A hyphen prefixed to a form indicates that it occurs only in composition. For ἡγαγον, see § 100, 2, n. 4.

NOTES.

¹ In each case let the student give the verb of the quoted sentence in its original form before quotation, and also all of its possible forms after being quoted.

² An indirect question may be introduced by the simple interrogative.

(in this case ποία), the general relative (ὅποία), or even, as here, the simple relative (οἷα). See § 149, 2, with note, § 282, 1, and § 87, 1. For the syntax of μένειν, see § 261, 1.

³ Object of λαμβάνομεν. The original question was, πόθεν τὰ ἐπιτήδεια λαμβάνομεν; See § 256.

⁴ § 277, 4.

⁵ § 282, 4.

⁶ In translating these sentences into Greek, determine first what the quoted sentence would be in the direct form in English, *so as to get the original tense*, which in Greek, it must be carefully remembered, *does not change* when the sentence is indirectly quoted. In English after secondary tenses a change of tense is the rule. This makes it often doubtful what the original form of the sentence was. In such a case the student must determine which seems the most natural, and take that.

⁷ πῶς. But see note 2, above.

⁸ Whether... or, εἰ... ἢ, § 282, 5.

⁹ Plural of σκευοφόρον.

¹⁰ § 184, 4.

¹¹ Greek idiom, *many and fair*.

¹² The original affirmation was, *we should die*, etc.

VOCABULARIES.

I. GREEK-ENGLISH VOCABULARY.

In the following Vocabulary the simple stem of each verb, when this does not appear in the present, *i. e.* unless the verb is of the *first class* (§ 108, I.), is given in () directly after the present indicative.

The capital Roman numeral given immediately after the parts of a verb designates the class to which the verb belongs. See § 108. When no such numeral occurs, the verb (except irregular verbs in *μι*) belongs to class I. Verbs in *μι* are marked 1 and 2. Those marked 2 are a subdivision of V. of the general classification. See § 108, V. 4. All other regular verbs in *μι* are marked 1. See notes 2 and 6, Lesson LVI. Compound verbs are not classified, nor are their principal parts given, if the simple verb occurs elsewhere in the Vocabulary. For fuller information concerning irregular verbs, see the Appendix to the Grammar. For futures in *ω*, *οὔμαι*, see § 110, II. 2, *n. l. c.* Deponents that are regular have the aorist middle unless it is otherwise stated. The case required by the verb is often designated by the letters A., D., or C., immediately added to the definition of its meaning.

The gender of nouns of the first declension is not given because obvious. Nouns whose genitive is not given are of the second declension, except neuters in *ος*, which are of the third and are inflected like *γένος*, § 52, 2.

The parts of compound words are separated by hyphens. The single dagger prefixed to a word pointing down (†) or up (‡), or the double dagger pointing in both directions (‡), points to some related word or words containing the common stem or root. When this device is not possible, the related word that shows best the stem or root follows in parenthesis.

The quantity of *α*, *ι*, and *υ*, when naturally *long*, is consistently marked throughout, except where such natural quantity is already indicated by the circumflex accent, as in *ἄθλος*. These vowels, when not marked, are to be pronounced *short*.

Words are to be sought for under their *themes*, though difficult forms, especially of verbs, will often be found in the alphabetical list. The old-style numerals refer to the Lessons. English words in small capitals are cognate with the Greek words, those in black letter are borrowed from them.

GREEK TEXT-BOOKS.

Goodwin's Greek Grammar.

By WILLIAM W. GOODWIN, Ph.D., Eliot Professor of Greek Literature in Harvard College. Revised and Enlarged Edition. Published in December, 1879. 12mo. Half morocco. 425 pages. Mailing Price, \$1.65; Introduction, \$1.50; Allowance for old book, 50 cents.

THE object of this Grammar is to state *general principles* clearly and distinctly, with special regard to those who are preparing for college.

In the new edition many important changes have been made. The part relating to the inflection of the Verb has been entirely rewritten, and increased from fifty to one hundred pages. Part III., on the Formation of Words, has been added in this edition. Part V., on Versification, is almost entirely new, and follows to a great extent the principles of J. H. H. Schmidt's *Rhythmic and Metric*. The other parts, especially the Syntax, have been thoroughly revised, and numerous additions have been made. The Catalogue of Verbs has been greatly enlarged, and each verb is now referred to its proper class in the classification of G. Curtius, which is adopted in the Grammar itself. The sections on the Syntax of the Verb are generally condensed from the author's larger work on the Greek Moods and Tenses, to which advanced students, and especially teachers, are referred for a fuller exposition of many matters which are merely hinted at in the Elementary Grammar.

This new edition has been published also by Macmillan & Co. in London, and is commended by British authorities as "the best Greek Grammar of its size in the English language."

Martin L. D'Ooge, *Professor of Greek in the University of Michigan*: The Grammar, it seems to me, hits the exact mean between a book of reference and a bare outline. It gives results concisely and yet fully

and clearly. Its treatment of the inflection of the verb is especially skillful and clear. I know of no Greek grammar for English-speaking students that combines so many merits in so attractive a form.

White's First Lessons in Greek.

Prepared to accompany Goodwin's Greek Grammar, and designed as an Introduction either to his Greek Reader or to his *Selections from Xenophon and Herodotus*, or to the *Anabasis* of Xenophon. By JOHN WILLIAMS WHITE, Ph.D., Professor of Greek in Harvard University. 12mo. Half-morocco. x + 286 pages. Mailing Price, \$1.30; Introduction, \$1.20; Allowance for old book, 25 cents.

A SERIES of eighty lessons, with progressive Greek-English and English-Greek Exercises, taken mainly from the first four books of *Xenophon's Anabasis*. The Exercises consist wholly of complete sentences, followed by a series of Additional Exercises on Forms, and complete Vocabularies. These lessons are carefully graded, and do not follow the order of arrangement of the Grammar, but begin the study of the verb with the second lesson, and then pursue it alternately with that of the remaining parts of speech.

Alexander Kerr, *Prof. of Greek, University of Wisconsin*: The best book for beginners which I have ever examined.

E. H. Wilson, *Prin. of High School, Middletown, Conn.*: It is the best book for beginners in Greek I have ever used.

Companion of Parallel References to Hadley and

Allen's Greek Grammar.

Designed to accompany the second edition of *A Series of First Lessons in Greek*. By JOHN WILLIAMS WHITE, Ph.D. iv + 45 pages. This pamphlet accompanies all copies of *White's First Lessons in Greek* free of charge, when so ordered, and thoroughly adapts the *First Lessons in Greek* to use with Hadley & Allen's Grammar. Exact parallels have been found to almost all the references in the *Lessons*, and the new references are more than simple parallels: they are made to present the particular point or subject *fully and completely*.

Leighton's New Greek Lessons.

With references to Hadley's Greek Grammar as well as to Goodwin's New Greek Grammar. Intended as an Introduction to *Xenophon's Anabasis* or to Goodwin's Greek Reader. By R. F. LEIGHTON, Ph.D. (Lips.), formerly Principal Brooklyn High School, N.Y. 12mo. Half-morocco. 283 pages. Mailing Price, \$1.30; Introduction, \$1.20; Allowance, 25 cents.

ABOUT seventy easy and well-graded lessons, both Greek and English, introduce the pupil to the first book of *Xenophon's Anabasis*, from which the Exercises and Vocabularies are mainly selected. The amount of matter to be translated into Greek is sufficient to prepare a student for most American colleges.

First Four Books of Xenophon's Anabasis.

With an illustrated Vocabulary. Edited by Professors W. W. GOODWIN and JOHN WILLIAMS WHITE, of Harvard University. 12mo. Half morocco. 355 pages. Mailing Price, \$1.65; Introduction, \$1.50; Allowance, 25 cents.

Without Vocabulary. Mailing Price, \$1.10; Introduction, \$1.00; Allowance, 25 cents.

THE Notes are copious, and much grammatical aid is given, chiefly in the form of references to the Grammar.

A colored map is added, giving the route of the Ten Thousand.

Until Professor White's Illustrated Vocabulary is ready, Professor Crosby's complete Lexicon will be bound with this edition.

Goodwin's Greek Reader.

Edited by Professor W. W. GOODWIN, of Harvard University. 12mo. Half morocco. 384 pages. Mailing Price, \$1.65; Introduction, \$1.50; Allowance, 25 cents.

CONSISTING of Selections from Xenophon, Plato, Herodotus, and Thucydides; being the full amount of Greek Prose required for admission to Harvard University. With colored maps, notes, and references to the revised and enlarged edition of Goodwin's Greek Grammar.

B. L. Cilley, *Professor of Greek*, *Phillips Exeter Academy*: The selections are good, the notes are well written, and, what I think much of, the type is clear and the book looks attractive.

Cebes' Tablet.

Edited with Introduction, Notes, Vocabulary, and Grammatical Questions, by RICHARD PARSONS, Professor of Greek, Ohio Wesleyan University. 12mo. Cloth. 94 pages. Mailing Price, 85 cents; for introduction, 75 cents.

THIS little volume has arisen from a belief that Cebes' Tablet deserves a higher recognition than it has received. In confirmation of this claim, editions based upon more modern data and research have recently appeared in Germany and England

In its preparation the works of Schweighäuser, Simpson, Drosihn, Büchling, and Jerram have been consulted, besides some minor

editions prepared for school and gymnasium use. The monographs of Drosihn (*Die Zeit des Pinar*) and of Dr. Carl Müller on the manuscript authorities (*De arte critica ad Cebetis Tabulam adhibenda*) have been of service.

Besides being an entertaining and instructive allegory, in the form of a lively dialogue, Cebes' Tablet is moderately easy to construe, and not above the comprehension of a boy of fourteen.

As a drill-book on forms and constructions, especially on interrogatives and conditional sentences, the work should come into use, to say nothing of its own intrinsic excellence. Particular attention is invited to the feature of questions.

It should be put into the hands of beginners in their second or third term's work as an alternative book to the *Anabasis*, which is in parts a little too military and tedious.

A. K. Wells, *Prof. of Greek, Antioch College, Yellow Springs, O.*: I am well pleased with it, and shall certainly use it next term with my beginning class. The *Anabasis* never seemed to me interesting enough to the average student to make a fit introduction to Greek literature. I think the Tablet will meet my need exactly. (Nov. 11, 1887.)

Greek Inflection.

DESIGNED to economize time for the teacher, by furnishing a large number of words for ready use, as paradigms, in the class-room, and at the same time to suggest a systematic and scientific treatment of the noun and verb.
